Because we care about the environment one of our company values is to treat our customers, suppliers and the planet with respect. When it comes to decorative light bulbs it can be difficult to find ones which are environment friendly. After a while of searching and testing we have now found, beautiful, stylish and yet eco proof bulbs.

Our new LED filament bulbs are just that!

Our new range of LED light bulbs have a warm color tone and a decorative wire for the great look. LED doesn't heat up much and they don't use a lot of power which makes them much more eco-friendly. Besides that they have a much longer life span, this way we also have less waist on our planet. Discover it yourself, this wonderful alternative to the traditional light bulb.
